Re: U.S. Patent Application No.: 09/778,759
Filing Date: 02/08/2001
Title: MAGNETIC POLE POSITION DETECTOR FOR ROTOR
Inventor(s): Yuki NAKAJIMA
Our Ref.: 040356-0354
Your Ref.: P-1024-U/99-00876

Dear Examiner Gonzalez:

Attached is a copy of a Supplemental Amendment filed in the U.S. Patent Office on September 5, 2002, in the application, along with a copy of the filing postcard. Our thinking is that you could review these claims prior to our formally submitting a petition addressing the missing supplemental amendment. I will contact you next week to discuss our future options.

With best regards

Very truly yours,

Martin J. Cosenza

Applicant: Yuki NAKAJIMA
Title: MAGNETIC POLE POSITION
DETECTOR FOR ROTOR
Appl. No.: 09/778,759
Filing Date: February 8, 2001
Examiner: Julio C. Gonzalez
Art Unit: 2834

SUPPLEMENTAL AMENDMENT

Commissioner of Patents
Washington, D.C. 20231

Sir:

Prior to continued examination on the merits, please amend the above-identified application as follows:

IN THE CLAIMS:

Please add the following new claims:

D' 19. (New) A magnet pole position detector for a rotor that has a plurality of rotating magnets disposed on a circular periphery, the detector comprising:

plates of the same number as the magnets, the plates being made of a magnetic material, each of the plates being disposed on the rotor at a position along a circular path nearby a corresponding magnet and magnetized by leakage flux on the corresponding magnet; and

a magnetic sensor adapted to output a signal in response to a variation of a magnetic flux density on the circular path; wherein

the detector is configured such that the magnetic flux is concentrated on the ends of the plates.
